

# Instructions for Partnering with ENERGY STAR® as a Manufacturer of ENERGY STAR Qualified Products

Organizations interested in partnering with ENERGY STAR as a Manufacturer of ENERGY STAR Qualified Products should take the following steps:

- 1. Review the Manufacturer Definition.
- 2. Review the Product Specifications, Eligibility Criteria, and Partner Commitments documents on <a href="https://www.energystar.gov">www.energystar.gov</a>. Go to the Partner Resources page and select 'Product Specifications' where you will find a detailed list of all eligible products with the corresponding documents.
- Select the area of interest for a new partnership and indicate your product on the Commitment Form. Please <u>ONLY</u> select the relevant product you manufacture in Section 7 under Manufacturer of ENERGY STAR Qualified Products.
- 4. Review, complete and sign the Partnership Agreement.
- 5. Return the Partnership Agreement and Commitment Form to ENERGY STAR at:

PARTNERSHIP@ENERGYSTAR.GOV c/o D&R International 1300 Spring Street, Suite 500 Silver Spring, MD 20910

ENERGY STAR will accept hard or electronic copies of the Partnership Agreement.

A copy of the signed Partnership Agreement will be returned to you for your records.

#### CHANGE FOR THE BETTER WITH ENERGY STAR

# Program Definitions and Eligible Organizations

#### Section 1. Energy Efficiency Program Sponsors

Eligible organizations: A regulated utility, publicly owned utility, or energy delivery company; a national, regional, state, or local government entity; an organization involved in coordinating and/or administering energy efficiency or environmental education programs that promote ENERGY STAR. See Program Requirements for Energy Efficiency Program Sponsors for the Commercial & Industrial Sectors and/or the Program Requirements for Energy Efficiency Program Sponsors (residential sector).

#### Section 2. Commercial and Industrial Service and Product Providers

Eligible organizations: An organization that offers energy-efficient products and/or services that agrees to promote and communicate ENERGY STAR to improve the energy performance of commercial buildings. Eligible organizations include: architects, and A/E firms, banks and commercial financial lenders, contractors, distributors, energy management service companies/consultants, energy service companies (ESCOs), engineers, equipment manufacturers, and unregulated energy retailers and marketers. See the ENERGY STAR Partnership Partner Requirements for Commercial & Industrial Service and Product Providers.

#### Section 3. Financing Partners

Eligible organizations for Mortgages for Energy-Efficient Homes: A mortgage lender offering special financing for ENERGY STAR qualified new homes. See Program Requirements for Lenders, Mortgages for Energy Efficient Homes.

Eligible organizations for Financing Partners for Energy-Efficient Products: A private lender or sponsor, such as manufacturer, utility, or retailer, who is interested in providing energy efficiency financing to their customers. See Program Requirements

## Section 4. Home Builders/Developers and Home Energy Raters

Eligible organizations: A site-built home builder constructing traditional homes on site; a manufactured home builder providing factory-built, HUD code-based homes; a home energy rater verifying the performance of ENERGY STAR qualified new homes. See the ENERGY STAR Partnership Agreement for Home Builders and Verification Organizations.

#### Section 5. Retailers/E-tailers and Buying Groups

Eligible organizations for Retailers/E-tailers: A retail organization selling, marketing, and promoting ENERGY STAR qualified products. Retail organizations can include independent retailers, national chains, buying groups, and online merchants. See Program Requirements for Retailers/E-tailers.

*Eligible organizations for Buying Groups*: A retail organization selling ENERGY STAR qualified products. See Program Requirements for Buying Groups.

#### Section 6. Business Improvement

*Eligible organizations*: Any public or private organization can partner to improve its facilities by committing to continuous improvement of its energy efficiency. For Program Requirements see the Partnership Letter in the Business Improvement section of <a href="https://www.energystar.gov">www.energystar.gov</a>.

#### Section 7: Manufacturers

Eligible Organizations: A company that manufactures or private labels any product(s) that meets the current ENERGY STAR qualification criteria.

# Partnership Agreement between ENERGY STAR®

(ENTER PARTNER NAME HERE)	

# an ENERGY STAR® Partner

#### **Partner Commitments**

ENERGY STAR Partner is committed to taking action in the area(s) indicated on the <u>ENERGY STAR</u> <u>Commitment Form</u>. For the designated program area(s), ENERGY STAR Partner agrees to fulfill all requirements as outlined in the following supporting documents:

- ENERGY STAR Program Requirements, defining requirements for being recognized as a partner in each
  program area, such as manufacturing, selling, or promoting ENERGY STAR qualified products to
  consumers or organizations. Specific requirements include identifying a responsible party for each
  area of participation and updating EPA/DOE on the efforts undertaken through the partnership. Where
  applicable, these include ENERGY STAR eligibility criteria defining the energy and other performance
  specifications that must be met for use of the ENERGY STAR mark on and/or in association with
  buildings, homes, and products; and
- ENERGY STAR Identity Guidelines, describing how the ENERGY STAR name and mark may be used. Partner will adhere to these guidelines and ensure that its authorized representatives, such as advertising agencies, dealers, and distributors, are also in compliance.

EPA/DOE will undertake a variety of efforts to build awareness of the ENERGY STAR name and mark, maintain the credibility of the ENERGY STAR name and mark, and promote the benefits of energy-efficient homes, buildings, products, services, and industrial facilities. EPA/DOE will strive to:

- increase awareness of the ENERGY STAR name and mark across the residential, commercial, and industrial sectors by distributing key messages on the benefits of ENERGY STAR qualified buildings, homes, and products;
- make current versions of the <u>ENERGY STAR Identity Guidelines</u> and <u>ENERGY STAR Program</u> <u>Requirements</u> easily accessible through the Internet and other means;
- maintain a Web site where ENERGY STAR Partner can furnish information on its program efforts and responsible key contacts as outlined in the <u>ENERGY STAR Program Requirements</u>; and
- provide ENERGY STAR Partner with public recognition through the Internet and other mechanisms for its efforts in the ENERGY STAR Partnership and its role in protecting the environment.

#### **Disclaimers**

Partner will not construe, claim, or imply that its participation in the ENERGY STAR program constitutes federal government approval, acceptance, or endorsement of anything other than Partner's commitment to the program. Partner understands its participation in the ENERGY STAR program does not constitute federal government endorsement of Partner or its buildings, homes, products, services, or industrial facilities. Partner understands that the activities it undertakes in connection with the ENERGY STAR program are voluntary and not intended to provide services to the federal government. As such, Partner will not submit a claim for compensation to any federal agency.

#### **Dispute Resolution**

Partner and EPA/DOE will assume good faith as a general principle for resolving conflicts under the ENERGY STAR program. Both parties will endeavor to resolve all matters informally, so as to preserve maximum public confidence in ENERGY STAR.

In the event informal channels do not produce a mutually agreeable resolution to a matter in dispute, either party to this agreement shall notify the other in writing as to the nature of the dispute, the specific corrective action sought, and their intent to terminate the Partnership Agreement, either as a whole or in part, unless specific corrective actions sought are undertaken:

- within 20 days of receiving formal notification from EPA/DOE indicating intent to terminate the Partnership Agreement, either as a whole or in part, Partner will reply, agreeing to either (1) undertake in a timely and effective manner the corrective actions sought by EPA/DOE, or (2) terminate the Partnership Agreement, either as a whole or in part;
- within 20 days of receiving formal notification from Partner indicating its intent to terminate the Partnership Agreement, either as a whole or in part, EPA/DOE will reply, either (1) agreeing to undertake in a timely and effective manner the corrective actions sought by Partner, or (2) explaining why such corrective actions cannot be undertaken;
- if Partner fails to respond within 20 days of receiving formal notification of EPA/DOE's intent to terminate the Partnership Agreement, either as a whole or in part, or if Partner responds but does not agree to undertake corrective actions sought by EPA/DOE, or if Partner agrees but does not initiate the corrective actions in a timely manner, then this agreement is terminated, either as a whole or in part.

## **Entry into Force and Duration of Agreement**

Both parties concur that this agreement and the terms outlined in the supporting documents will become effective when signed by both parties. This agreement may be updated at any time to add new areas for which ENERGY STAR Partner wants to be recognized as a partner. Both parties concur that this agreement is wholly voluntary and may be terminated by *either party* at any time, and for any reason, with no penalty. Failure to comply with this Partnership Agreement, applicable Program Requirements, and Identity Guidelines can result in termination of this agreement and authorization to use the ENERGY STAR mark. EPA/DOE will actively pursue actions for resolving issues of noncompliance.

The undersigned hereby execute this Partnership Agreement on behalf of their party. The signatories of this agreement affirm that they have the authority to execute this agreement on behalf of ENERGY STAR Partner and EPA/DOE.
